

PRESS RELEASE

Release date: 12th January 2005

Access Data visit CY4OR

In response to the weighty demand for CY4OR's services, the Forensic Investigation team at CY4OR recruited several new analysts in 2005.

As part of the investment the company makes in training their staff, they welcomed a visit from Rob Attoe, International Training Coordinator of American based Access Data, who led a bespoke training session at CY4OR's head office in Manchester.

The day covered the application and understanding of the Ultimate Forensic Tool Kit, Access Data's most advanced forensic software. The agenda was refined to suit what is already a highly experienced team and offered advanced insight into Code Breaking and Applied Decryption.

Joel Tobias, Managing director of CY4OR commented; 'Investing in training ensures we remain at the cutting edge of computer forensic technology, applications and procedures. As a result, we are able to offer our clients the most comprehensive services available to our industry'.

All CY4OR analysts are fully Encase trained to either Encase intermediate level, Encase advanced level or Encase Certified Examiner level.
